

Humans Need Not Apply

Do you think its easy being an alien, a satanic creature or anything else not considered part of the Homo sapiens only club? They have tough days just like humans do and their frustration is growing. Dont believe it? Well, what about Lucifer, the prince of darkness, who runs a car dealership--what about his feelings when he is faced with that impossible sale and he cant get that signature on form 666, the standard soul contract? Or maybe you wondered about how an extremely vain alien copes with having a bad hair day as he tries to alter the future of Earth? Will his cosmetic problems be our problems in other ways? Perhaps you heard about the opposite vampire who loves to give blood, hates the darkness and has a fetish for garlichow does he get through a bad relationship? How about a DNA altered cat that has been given the personality of one of the worlds most fearsome criminals? Will its human owners understand or will it be a less then purr-fect arrangement? Whats the common thread to all this discontent, you ask? What is it about most stories that stay the same? Its the human! These aliens and demonic creatures are sick and tired of being the second fiddle in the story. They want what everybody wants: to be the center of attention of the stories instead of the pesky humans for a changeand now they finally get their wish.
