

The Cage of Zeus

The future of sex and the future of terrorism collide. Reads L to R (Western Style), for audiences A The rounds are humans with the sex organs of both genders. Artificially created to test the limits of the human body in space, they are now a minority, despised and hunted by the terrorist group Vessel of Life. Aboard Zeus I, a space station orbiting the planet Jupiter, the rounds have created their own society with a radically different view of gender and of life itself. Security chief Shirosaki keeps the peace between the rounds and the typically gendered mono, but when a terrorist strike hits the station, the balance of power and tolerance is at risk, and an entire people is targeted for genocide.
